- Wireless USB Device Adapter (plugs into Docking Base)
- Docking Base with DVI connector, 3.5mm audio jack (Stereo), and two USB connectors
- Power Supply Unit
- Quick Start Guide
- CD with software, drivers and user manual

Overview

The Wireless USB DisplayDock Set allows users to wirelessly connect their notebook PCs to their desktop environment, consisting of a monitor, speakers, keyboard and mouse, without having to use any cables.

The set includes a PC Adapter and a pre-paired DisplayDock (comprised of a Device Adapter and a Docking Base), enabling a quick, hassle-free setup and immediate operation.

The Wireless USB DisplayDock Set provides full room coverage, making it ideal for using with a large screen and listening to music from the laptop, without cable length limitations. Plug and play functionality provides users with the freedom of walking away with the notebook PC and immediately getting connected when re-entering the room.

The Wireless USB DisplayDock Set incorporates Wisair's WSR601 single chip and Wisair's UltraSpeed technology, delivering the best combination of wireless performance and cost.

From their laptop, users can wirelessly connect to an LCD display, keyboard, mouse and speakers.

Wireless USB DisplayDock Set

Product Brief

About Wisair

Wisair is a fabless semiconductor company providing Ultra Wideband (UWB) and Wireless USB solutions based on its CMOS single chip. Recognized for their superior coverage and throughput, Wisair's solutions offer the best combination of performance, price, and power consumption for Wireless USB.
